Right turn out not below 1000ft amsl

High intensity traffic in circuit up to 2400ft due to extensive training in IMC and VMC Circuits LH at 1200ft QNH

**Section B:**

**Land Parcels**

Land parcels are individual areas of land that gas transmission pipelines cross. Each land parcel is given a unique land parcel ID by National Grid.

Each land parcel is also given two grid references that are at the opposite boundaries of the land parcel, along the direction of the gas transmission pipeline. If the map we've provided isn't clear, you can use websites such as [www.streetmap.co.uk](http://www.streetmap.co.uk) to provide us with better details, using the start and end grid references shown below.

Our records show that you are currently associated with the following land parcel(s). Please check that these details are correct and amend if necessary. The section of pipeline that our records show are associated with your land appear between two red crosses on each map.

Our Land Parcel ID	05STTAABRI0110	Land Parcel Description	ROXWELL TO LUXBOROUGH LANE
Start Grid Ref	548931,197591	End Grid Ref	548787,197540
Rural Land Register ID no.		Your reference (optional); Eg. Memorable name	
Owner	HERTS & ESSEX AERO CLUB LTD	Amend owner here:	
Occupier		Amend occupier here:	
Agent		Amend agent here:	
Comments: Eg. new tenant/occupier address, contact info and any work you may be planning on the land
